

Figure 2. Rear View of Filler Panel (Transport Components Removed for Clarity)

14. Remove front extrusion assembly (arm rest) from cabinet by removing two screws.
15. Remove six screws holding rear overlay panel and remove panel (see Figure 3).
16. Remove three transport mounting screws from transport mounting holes (see Figure 4) and remove transport from case.
17. Disconnect fan connector P20.
18. Remove ground strap that connects to electronics assembly from the tape transport. On early production units, strap is located front left of transport. On later units, strap is located in the rear of the head connector area.
19. Disconnect electronics assembly harness connector P16 that connects to tach sensor connector J16.
20. Disconnect electronics assembly harness connector P15 that connects to reel drive connector P15.
