

Nylon11.com had a nice interview with Emma, Who is an amazing artist. She has a huge fetish. Sit back and enjoy this interview we had...  
1Q You have a big fetish for Nylons, at least that could we see in your Biography. When did your Mom or Granny see you had a fetish for nylons? Or do they still not know that today?

Hi Michael, thanks very much for your interest in talking with me.

I started investigating the sensuality of hosiery at a fairly early age, as you know from my web site bio ( <http://home.fuse.net/mcdmcx/EmmaSite/Bios.htm> ). Somewhere around the age of 9 or 10 I began to experiment with Full Fashion Stockings in my Grandmothers collection. It was then, that I became completely hooked on the sensations.

Shortly there after, I began experimenting with my mothers pantyhose (and wardrobe). I then began my own hosiery collection somewhere around age 12-13. My grandmother never did know about my interests. My mother however, would find my collection under my mattress and discard it. Only to discover it had been replaced and hidden again. She never mentioned this series of discoveries, nor did I.

My hosiery collection alone, is over 300 pair currently.

2Q When did you become a real Cross-dresser (CD)?

Laughs! Ya know, I honestly don't consider myself a cross dresser. Long story there... But; if you mean, when did Emma materialize? Emma was born shortly after I dissolved a body wear manufacturing company I had.

Re-exploration of sensuality returned with body wear, while manufacturing the product. I / we needed a large / x large model for patterning; so I became it. It looked pretty silly standing there

as a boy in tights. So, as I got back into my little interest; I started to investigate, pulling off a female look.

Emma did not come about till several years later. When I felt like the persona I had developed was ready for public consumption, she was given a name and born. That was about 5 or 6 years ago.

**3Q You have also many other fetishes?**

Hmmm... Fetishes? Interests? Compulsion? Aphrodisiac? Obsessions? Passions?

I am so anal retentive... Remember 'Rain Man'? giggles... Well I'm close to that. So if I find something of interest; I usually over indulge.

Yes, I am involved with your standard clothing fetishes. I love all types of hosiery, HIGH heels, vintage foundations (girdles, bras, bustiers, FF Stockings, etc), rubber (I make all my own latex wear), corsets and so much more.

I am also a fetishist about fine wines, beer, food, photography, fashion, (fine, graphic, industrial, musical) Arts, Interior Design, Architecture, Lighting design, travel, LORDY, I could go on forever... My problem is; the amount of hours in the day. We need to fix this problem... \*grins\*

**4Q What do you like the most of your main fetish?**

I guess I don't have a main fetish. I kind of look at what I do; like food or music. You wouldn't want to eat the same meal three times a day, every day. And you wouldn't want to hear the same song over and over, constantly... Sadly in the 70s 'Stairway To Heaven' came close to that. What's with Pop Radio anyway...?!

What I CAN say is that a common thread runs through all the things I do.

I get enjoyment / pleasure, from the sensuality of the endeavor. That means; one or several of the five senses are being stimulated, causing a complex mind and physical gratification.

**5Q What is the strangest thing that ever happened to you on the street while wearing stockings? (or some other thing related to one of your fetishes?)**

Sex in public was a fetish for a while. So, in a New York City Hotel Bar while (American) Football playoffs were happening; I was having sex at an open table, with my wife. Not

strange... just a fetish.

The strangest thing is yet to come. lol

6Q You are also a graphic designer and Fashion Designer. Can you tell us a bit more of your creative life?

Sure... Kids, GO TO MEDICAL SCHOOL! laughs...

Being in the arts is wonderful and very self rewarding. It unfortunately does not pay all that well. I believe that as long as you know composition you can learn a new tool from any discipline and use it. From cuisine, to sculpture, to fashion, its all about composition.

7Q You are also a Model?

Uhm sort of... I design and produce garments, model the outfit, pose creatively, design and light a setting, sculpt my body and face to create a character that is photogenic enough to create a final product. That final product being an interesting and publishable (self taken) photograph. Lots of work to get to that end result, eh? Hope its entertaining...

I have been lucky enough in creating this personality and photo art; that I have been asked to do modeling for clothing lines, fetish conventions and a few other things. That has been pretty fun!

When I was running my garment company; I was also the creative director. In that capacity, I was the art director and photographer as well. I told my models what I needed and how to make a good photo for my product. Some of the girls needed no help and I also learned from them.

I learned to pose and compose (for the camera) from that experience and also, my rock n roll days, being on stage.

Marquis Magazine was kind enough to ad me to their Fetish Model Directory for the second year in a row. Its quite a compliment to be included as the only non genetic girl in the directory... Kudos Marquis (and thanks)!

8Q Do you always go out dressed?

I live in a city that is sadly, very conservative. I rarely go out here. Most of my photos are done in my home. I make an effort to get to other cities like London for The Rubber Ball and Toronto for North Bound Leather's URGE party.

When I go out; I want attention... It usually happens.

Recently, I have made efforts to go out in public (in mode) and not be 'made', meaning to pass as a girl. This has been a fun project studying mannerisms, movement and visuals

and its been working fairly well. Its not easy passing at 6 feet tall. Girls are amazing to watch! mmmmmmmmm! It is also amazing to be treated as

a female; the best and the not so good. It has been a wild learning path.

**9Q What do you feel inside when you switch from male clothes to female clothes?**

Great question. I feel a miracle has happened every time I put the girl on! Its such a complete change. It is amazing!

I also feel the sensuality of the garments. The textures interact with each other and me, causing wonderful sensations. The garments and shoes also help re-sculpt my figure, which is exciting. That sculpting is also a very sensual experience. I make an undergarment called a gaff. It nips my waist and tucks the boy parts. I also make my own corsets that are mostly worn on the outside of my clothing as a fashion statement. Lacing the corset as tight as it can go and completely reshaping my torso gives me a HUGE rush of endorphins.

**10Q What is your sexual preference now? (If I may ask?)**

Sure, you can ask... I am into "pretty". I always have been... That means I am into girls. I am addicted the way girls feel, look, behave; pretty much the whole package.

Males have never been an attraction. There are however, huge amounts of males out there that find this gender bending thing quite stimulating. Lots of males either try it, or are attracted to others who dress en femme. The numbers are rather astounding. You can go to my Yahoo group (<http://groups.yahoo.com/group/emmamsfetishtgirls/>) and look at the members list to get a rough idea of the break down.

How did we ever live without the internet???

**11Q Do you wear pantyhose sometimes? If so why?**

I do wear pantyhose in addition to FF Stockings and I even wear stretch stockings. The reason? Back to the food analogy... I would get bored if I always did the same thing.

Pantyhose has unique sensual qualities, just as FF Stockings have their unique qualities. I LOVE the form fit that Lycra, in pantyhose and other garments gives. The body encasement can be associated with sexual sensation. I often combine, FF Stockings with pantyhose or rubber wear and several other delectable treats.

12Q Are there any new features to your website this year?

I'm thinking about doing a members section for the web site. Do ya think anyone might visit?

I also JUST started a new Yahoo group (<http://groups.yahoo.com/group/Emmamsfetish5000/>). I recently realized that the titles for the other groups may have been preventing other (female & male) fetishists from posting their own images. Silly me... So I plan on promoting that in the near future.
